

Observed and Estimated Total Bycatch of Salmon in the 2002-2018 U.S. West Coast Fisheries: Cover Page

This report summarizes the observed and estimated total bycatch in terms of individual counts and weights for all salmon species observed in fisheries monitored by the West Coast Groundfish Observer Program, the At-Sea Hake Observer Program, the Electronic Monitoring Program, and the Catch Monitor Program.

This report is available in electronic format only as an Excel workbook (Agenda Item H.1.b, Observed and Estimated Total Bycatch of Salmon in the 2002-2018 U.S. West Coast Fisheries) and is linked on the Pacific Fishery Management Council's November 2019 Advanced Briefing Book webpage
