

COASTAL PELAGIC SPECIES MANAGEMENT TEAM REPORT ON MEMBERSHIP
APPOINTMENTS AND COUNCIL OPERATING PROCEDURES

The Coastal Pelagic Species Management Team (CPSMT) briefly discussed the process for Pacific Fishery Management Council (Council) consideration of methodology review proposals for CPS fisheries. The CPSMT notes that there have been no methodology review proposals submitted for November meetings since 2016, and suggests that the Council identify a different scheduling approach to CPS methodology reviews and potentially revise Council Operating Procedure 26. The CPSMT and Coastal Pelagic Species Advisory Subpanel will both be present at the April Council meeting if the Council wishes to explore an alternative approach.
