

ECOSYSTEM ADVISORY SUBPANEL REPORT ON FUTURE COUNCIL MEETING
AGENDA AND WORKLOAD PLANNING

The Ecosystem Advisory Subpanel (EAS) requests time on our September 2020 agenda to meet with the NOAA Integrated Ecosystem Assessment team to discuss potential items to be included in the 2021 Annual Ecosystem Status Report. We are especially interested in indicators and information that focus on social and economic outcomes. We would also like to discuss how the report can better integrate across oceanographic conditions, Fishery Management Plans, and human dimensions.

We also request briefings on the following in September 2020:

- Highly Migratory Species Essential Fish Habitat Phase I Report
- Groundfish humpback whale Incidental Take Statement
- Research and Data Needs Process
