

COASTAL PELAGIC SPECIES ADVISORY SUBPANEL REPORT ON FUTURE COUNCIL
MEETING AGENDA AND WORKLOAD PLANNING

The Coastal Pelagic Species Advisory Subpanel (CPSAS) discussed the increasing interest in establishing marine energy projects off the West Coast and encourages the Council to remain engaged with this issue and marine spatial planning. The CPSAS commends efforts to improve coordination with agencies such as the Bureau of Ocean Energy Management. The CPSAS recommends that the Council consider the future formation of an ad hoc committee to address the issues of marine energy projects and their siting as a means of increasing stakeholder involvement without additionally burdening existing Advisory Bodies.
