

HIGHLY MIGRATORY SPECIES ADVISORY SUBPANEL REPORT ON  
CLIMATE AND COMMUNITIES INITIATIVE UPDATE

The Highly Migratory Species Advisory Subpanel (HMSAS) has reviewed the materials submitted under Agenda item F1 – Climate and Communities Initiative Update. We appreciate the effort that Jonathan Star and the Climate and Communities Core Team has taken to solicit input from all of the Council’s advisory bodies and other interested stakeholders. We support the Initiative’s work in developing the various scenarios and look forward to engaging in the upcoming workshops. We would like to request that at least one of our members be invited to attend each of the Implications Workshops. We also think these workshops would benefit from inviting local HMS fishery participants.
