Status Report of the 2020 Ocean Salmon Fisheries off Washington, Oregon, and California  
Preliminary data through August 31, 2020 (*continued*)

a/ Inseason estimates are preliminary. Due to field sampling challenges associated with Covid-19 safety precautions, California estimates for May and June were derived using alternative methodologies, and may differ from the postseason estimates that will be reported in early 2021.

b/ Non-Indian coho fisheries are mark-selective prior to Sept., and non-mark-selective recreational fisheries occur in Sept., (except NOF rec.) see the regulations for details.

c/ Effort is reported as landings. Total allowable catch is 35,000 Chinook for Treaty Indian fisheries in 2020.

d/ Numbers shown as Chinook quotas for non-Indian troll and rec. fisheries NOF are guidelines not quotas; only the total Chinook allowable catch is a quota.

e/ NOF non-Indian troll chinook quota during the period July 1 - Sept 30 was adjusted inseason from the preseason quota of 13,820 when Chinook remaining on the spring fishery quota were rolled into the summer fishery quota. The Chinook spring quota shown here is reduced from the preseason quota of 13,820.

f/ Commercial troll monthly Chinook quotas may be transferred inseason on an impact neutral basis to the next opening period. In the Oregon KMZ, the Chinook preseason quotas were 700 in June and 300 in July.

g/ NOF recreational coho quotas may be adjusted from preseason due to impact neutral transfers between areas and from the NOF non-Indian troll fishery. The preseason quotas were: 2,760 coho and 5,600 Chinook in Neah Bay; 690 coho and 1,300 Chinook in La Push; 9,800 coho and 12,460 Chinook in Westport; and 13,250 coho and 7,000 Chinook in the Columbia River subarea.

h/ Cape Falcon to Humbug Mt. recreational non-mark selective coho quota may be adjusted from preseason due to an impact neutral transfer from the recreational (mark-selective) coho quota. The preseason quota was 3,000 non marked coho.
