

SALMON TECHNICAL TEAM REPORT ON
THE PROPOSED 2021 PRESEASON MANAGEMENT SCHEDULE

The Salmon Technical Team (STT) has reviewed Agenda Item F.1, Attachment 1, the proposed schedule for developing 2021 ocean salmon fishery management measures, and supports moving forward with the schedule as outlined in this agenda item. While the expectation is that the 2021 preseason planning process will occur entirely via virtual meetings, the STT does not anticipate any setbacks and expects to provide accurate and timely analyses and reports.
