Agenda Item G.1.b
Supplemental PSTAT Presentation 1
March 2021

Northeast Pacific Sablefish Management Strategy Evaluation

April 2021 Stakeholder Outreach Workshop

PFMC
March 2021

The Pacific Sablefish Transboundary Assessment Team (PSTAT)

Began during 2016 as a scientific collaboration including AFSC, DFO Canada, NWFSC, and ADFG

Expanded to PMFC and NPFMC 2020/2021

Motivated by concurrent long term stock declines across all regions

Responsive to 2017/2018 PFMC SSC recommendations to develop a population model based on sablefish stock structure

PSTAT focus

NE Pacific wide data analyses

Use MSE to improve regional scientific advice

Spring 2021 MSE stakeholder workshop

April 27-29

Introduction to MSE and Stakeholder Engagement

NE Pacific sablefish MSE Operating Model

Identifying MSE objectives

Identifying MSE performance metrics

Understand/discuss proposed MSE management strategies, discuss future management strategies research
