

## ECOSYSTEM ADVISORY SUBPANEL REPORT ON LEGISLATIVE MATTERS

The Ecosystem Advisory Subpanel met and discussed the two draft letters regarding Executive Order 14008 (Agenda Item H.3, Attachments 3 and 4); one to the Secretaries of Interior and Commerce, and a second to the acting administrator of the National Oceanic and Atmospheric Administration Fisheries. The letters do a good job of highlighting the Pacific Fishery Management Council's (Council) engagement regarding climate change and fisheries and protected area management. The letters articulate Council progress on fishery management activities that contribute to a healthy and productive ecosystem informed by science, data, and community engagement.
