

PROPOSED AGENDA

COASTAL PELAGIC SPECIES MANAGEMENT TEAM

Pacific Fishery Management Council

2 August, 2021

This meeting will be focused on the National Marine Fisheries Service (NMFS) rule to implement provisions of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) that require all Fishery Management Plans (FMPs) to establish a standardized bycatch reporting methodology (SBRM) to assess the amount and type of bycatch occurring in a fishery. Other matters such as administrative, ecosystem, and coastal pelagic species topics at upcoming Pacific Council meetings, and the Coastal Pelagic Species Stock Assessment and Fishery Evaluation document may be addressed as well. This online meeting is open to the public. Public comment may be taken at the discretion of the Chair. Please refer to the [Meeting Notice](#) on the Pacific Fishery Management Council's webpage for more information and detailed instructions on joining the meeting.

Monday, August 2, 2021 – 1:00 p.m.
