

SALMON TECHNICAL TEAM REPORT ON
THE PROPOSED 2022 PRESEASON MANAGEMENT SCHEDULE

The Salmon Technical Team (STT) has reviewed Agenda Item F.2, Attachment 1, the proposed schedule for developing 2022 ocean salmon fishery management measures, and supports moving forward with the schedule as outlined in this agenda item. While some of the 2022 preseason planning process may occur via virtual meetings, the STT does not anticipate any setbacks and expects to provide accurate and timely analyses and reports.
