

Coastal Pelagic Species
Fishery Management Plan
Management Categories

Introduction and Background

November 2018 Council begins process to consider removing concept of categorizing CPS management unit species

June 2019 Council directed CPSMT to develop draft FMP revisions

Retain management approaches for CPS management unit stocks

Use stock specific management descriptions rather than categorical assignment

Remove references to named management categories but not revise the way the CPS stocks are managed

November 2021 Council to consider draft revisions for public review

CPSMT Report with Draft Revisions

Agenda Item 1.2.a, CPSMT Report 1

- Background
- Summary of changes by section
- Proposed FMP language

Draft Revisions:

- Remove management category nomenclature
- Eliminate categorical assignments
- Retain type of management approaches
- Maintain existing management unit species descriptions
- Do not alter current harvest policy, stock assessment priority or frequency, or frequency of harvest management specifications
- Clearly identifies stocks in the FMP
- Include some minor housekeeping

CPS FMP Management Unit Species (MUS)

Current Management Categories

Active

Periodic Assessment and Harvest Specification
