

Corrections to Pacific Coast Groundfish Fishery 2023-2024 Harvest Specifications and Management Measures: Draft Management Measure Analytical Document.

The purpose of this document is to report and correct errors as found in the Pacific Coast Groundfish Fishery 2023-2024 Harvest Specifications and Management Measures: Draft Management Measure Analytical Document ([Agenda Item F.6, Attachment 2, June 2022](#)). This correction will be incorporated into the final version. That version will be available as an informational report at the Pacific Fishery Management Council’s (Council) September meeting, which will also detail the Council Final Preferred Alternative for this action.

1. Tables 3-28 incorrectly reported the LEFG Share as 3,240 mt. This amount should be 2,346 mt. All other amounts are correct for the Baseline limited entry fixed gear sablefish FMP allocations north of 36° N. lat.

Table 3-1. Baseline - Limited entry sablefish FMP allocations north of 36° N. lat. for 2021. Data source: [PacFIN APEX Report GMT015 - Final Specifications](#)

Yr.	Non-Tribal Com. HG	LE Share	LE FG Share (mt) a/			Landed Catch Share b/			Estimated Tier Limits (lbs.) b/ c/		
			LE FG	Pri. Tier	LE FG DTL	LE FG	Pri. Tier	LE FG DTL	Tier 1	Tier 2	Tier 3
2021	6,165	5,586	2,346	1,994	352	2,238	1,902	336	58,649	26,659	15,234

2. a/ Shares are total mortality and include a landed component and a discard mortality component.
3. b/The limited entry fixed gear landed catch share is the limited entry fixed gear share reduced by the anticipated discard mortality of sablefish, based on WCGOP data from 2002 to 2019. In 2021, 23 percent of the sablefish caught were anticipated to be discarded of which 20 percent are expected to die.
4. c/Ratio of limits between the Primary Fishery tiers is approximately 1:1.75:3.85 for Tier 3:Tier 2:Tier 1, respectively.
