

“ Wish I had something like this 10 years ago. ”

“ It has been incredibly eye-opening. This program is a MUST for anyone looking to get involved in fisheries management. ”

“ As a fisherman, I now have a much better understanding of how to engage in fisheries management. ”

By fishermen, for fishermen, the Marine Resource Education Program (MREP) offers an unbiased look into local fishery science and management. The MREP West Coast workshops are tailored to the region and bring together commercial, charter, and recreational fishermen with scientists and managers to learn the processes, share insights, and network in a neutral and professional setting. This workshop series will equip you with tools to participate in shaping regulatory action and in collaborative science. If you're interested, apply to the 2022-23 MREP West Coast workshops.

Preference will be given to applications received by August 21. Accepted participants will be notified by phone and email by September 1. **Attending the workshop is free to all fishermen participants!** MREP reimburses travel costs and pays for hotel lodging and meals.

For more information, please contact:

- **Bob Dooley**, commercial fisherman, at (650) 619-4713
- **Dan Wolford**, recreational fisherman, at (408) 656-1524
- **Brad Pettinger**, commercial fisherman, at (541) 251-1746

General questions about the program should be directed to: **Lauren O'Brien**, MREP National Program Manager, (207) 228-1684 or lobrien@gmri.org, or visit us at mrep.gmri.org.
