

HABITAT COMMITTEE REPORT ON FUTURE MEETING AGENDA AND WORKLOAD PLANNING

The Habitat Committee (HC) discussed future meeting and workload planning, noting that the HC is tentatively scheduled to meet in person in March 2023 and online in April 2023. The HC would like to better understand the factors that determine whether the HC is to meet online or to meet in person, in order to help the decision-making process. The HC would like to meet in person when there are essential fish habitat or other important habitat-related issues on the agenda, and significant opportunities to interact with other advisory bodies. We also request the ability to continue to have online (hybrid) meeting options for our members who cannot attend in person, due to health or other valid reasons.
