a/ Inseason action has been necessary to ensure the fishery remained within, or had adequate access to, the annual allocation since 2013, except for 2016. The inseason actions includes extending the fishery beyond June 30.

b/ 40,227 lbs. preseason allocation plus 3,440 lbs. transferred inseason from the directed halibut fishery.

c/ 29,671 lbs. preseason allocation plus 4,000 lbs. transferred inseason from the directed halibut fishery.

d/ Each year in April the Council adopts limits for the upcoming salmon season beginning May 16 until the salmon season closes. At the same time, the Council adopts limits beginning April 1 of the next year until modified inseason or replaced with the rules adopted for the next salmon season (which begin May 16). Beginning April 1, 2023, the Council-adopted limits are no more than 1 Pacific halibut per each 2 Chinook, except 1 Pacific halibut may be landed without meeting the ratio requirement, and no more than 35 halibut may be landed per trip (1 + 1 per each 2, trip limit 35).

a/ The incidental fishery during the directed, fixed gear sablefish season is restricted to waters that are north of Point Chehalis, Washington, (46°53.30' N. latitude) under regulations promulgated by NOAA Fisheries at 50 CFR 300.63. Landing restrictions for Pacific halibut retention in the fixed gear sablefish fishery can be found at 50 CFR 660.231.

b/ Inseason action was necessary in to ensure the fishery remained within, or had adequate access to, the annual allocation every year since 2015, with the exception of 2016-2019 and 2022.

c/ Beginning April 1, 2020, Pacific halibut landing limit was 200 pounds (dressed weight) of halibut per 1,000 pounds (dressed weight) of sablefish and up to 2 additional halibut in excess of the landing limit ratio (2+200 per 1,000 lbs). Effective October 19, 2020 the landing limit was changed to 2+ 250 per 1,000 lbs through inseason action.

d/ Beginning April 1, 2021, Pacific halibut landing limit was 225 pounds (dressed weight) of halibut per 1,000 pounds (dressed weight) of sablefish and up to 2 additional halibut in excess of the landing limit ratio (2+225 per 1,000 lbs). Inseason action was taken at the September Council meeting to extend the fishery through December 31, 2021.

e/ Unless revised, Pacific halibut may be retained starting April 1, 2023 with the landing ratios in effect at the close of the 2022 season. The landing limit was 150 pounds dressed weight of halibut for every 1,000 pounds dressed weight of sablefish landed, and up to 2 additional halibut in excess of the ratio requirement (2 + 150 lb per 1,000 lb).
