

INSEASON ADJUSTMENTS – FINAL ACTION

Groundfish management measures are set by the Pacific Fishery Management Council (Council) with the general understanding that these measures will need to be adjusted within the biennium to attain, but not exceed, the annual catch limits. This agenda item will consider progress to date of the groundfish fishery as well as routine inseason adjustments to the 2023 fisheries, as appropriate. Adjustments are, in part, based on recent landings data and the latest information from the West Coast Groundfish Observer Program.

The Groundfish Management Team (GMT) and the Groundfish Advisory Subpanel (GAP) are expected to provide reports to the Council under this agenda item. The most recent groundfish landings data are available on PacFIN's APEX website <https://pacfin.psmfc.org/reports/> in report [GMT007](#).

Council Action:

- 1. Consider projections for the 2023 fisheries.**
- 2. Adopt 2023 inseason adjustments, as necessary.**
