

COASTAL PELAGIC SPECIES ADVISORY SUBPANEL REPORT ON FISHERY
MANAGEMENT PLAN (FMP) HOUSEKEEPING- FINAL ACTION

The Coastal Pelagic Species Advisory Subpanel (CPSAS) thanks the Coastal Pelagic Species Management Team and Agency and Council staff for their tremendous efforts in developing the proposed revisions to the fishery management plan (FMP) and the supporting documents to allow stakeholders to track the revisions. The proposed revisions will clarify several aspects of the FMP to better allow stakeholders to understand the management of CPS without making any substantive changes to the FMP or that process. We support approval of these changes by the Council.
