

LEGISLATIVE COMMITTEE REPORT

The Legislative Committee (LC) met on Wednesday, June 21 to consider the status of legislation in the 118th US Congress. The LC did not identify any pending legislation that would appear to be germane to the Pacific Fishery Management Council (Council). In addition, there have not been any requests for Council input from Federal or State legislative bodies. Barring any new legislation that may concern the Council, the LC will meet again concurrently with the November meeting.
