FISHERIES

Southwest Fisheries Science Center Coastal Pelagic Species Research Update

Presenter

Annie Yau, Fisheries Resources Division Director

Outline

**NOAA
FISHERIES**

- FUTURE SEAS stakeholder engagement workshop follow-up
- Integrated survey update
- Sardine research update

NOAA
FISHERIES

Future Seas stakeholder engagement workshop follow-up

future-seas.com

- The workshop report from the November meeting has been finalized and will be published as a NOAA report. Thank you to all the participants for your input.
- The CPS landings model paper that was discussed at the workshop is under review in a peer-reviewed journal
- Felipe Quezada-Escalona is now developing the model of CPS vessel participation. He would like to ask fishery participants some follow-up questions about their decision process of choosing which species to target and where to land their catch. If you are willing to provide additional input please email

Dr. Felipe Quezada-Escalona (felipe.quezada@noaa.gov) or

Dr. Stephen Stohs (stephen.stohs@noaa.gov)

Integrated West Coast Pelagics Survey

By 2025 and beyond, NMFS will integrate NWFSC and SWFSC west coast surveys of hake and coastal pelagic species

- Outreach meetings held April 19 and June 21, with more to come
- Summer 2023: Planning to compare nighttime purse seining, daytime midwater trawling, and nighttime surface trawling
- Through 2023: Looking to procure and test a net asap
