# Who We Are:

- **Copenhagen Infrastructure Partners (CIP)** is the world's largest renewable energy investment fund.
- Global portfolio includes over 5,000MW of floating offshore wind development.
- CIP currently holds 2 federal offshore wind lease areas in the United States including Vineyard Northeast, and Vineyard MidAtlantic . Recently awarded provisional lease in Humboldt.
- **Vineyard Offshore** is the development team for CIP's offshore wind leases in the United States. This includes the first US commercial scale offshore wind project, which is currently under construction.

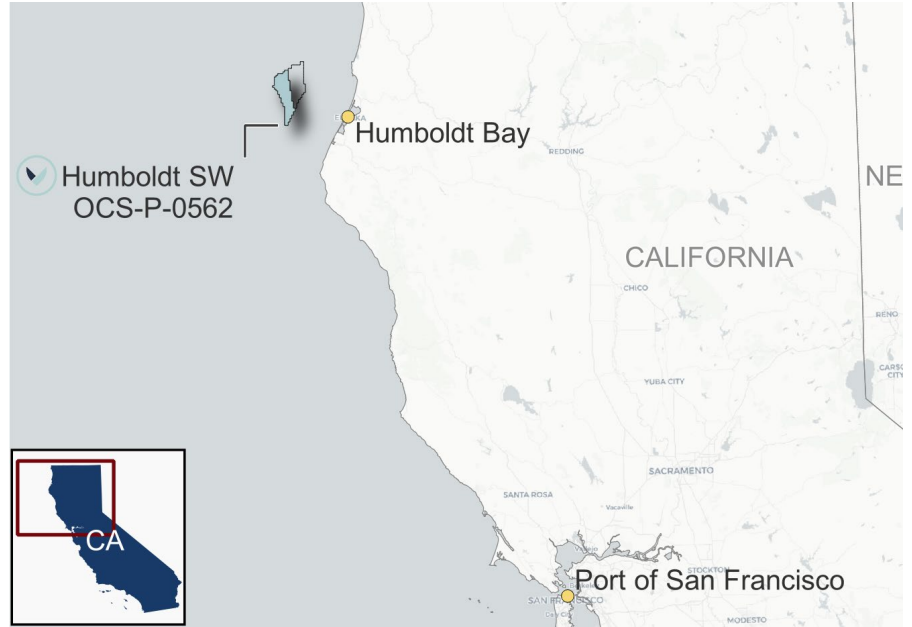

# CIP & Vineyard Offshore: East Coast Development Portfolio

- Vineyard Offshore is currently building the **Vineyard Wind I** project in Massachusetts, an 800 MW project.
- Vineyard Offshore is actively developing two additional CIP lease areas known as Vineyard Northeast and Vineyard Mid Atlantic.
- Together, these projects will generate enough clean, renewable and cost-effective energy to power at least 2.4 million homes.

# CIP & Vineyard Offshore: Humboldt Lease Area

- Lessor of Lease Area OCSP 0562. Approximately 69,031 acres in size. Adjacent to RWE Lease.
- We have been working with Magellan Wind, our local development partners, to help advance the project locally –and are transitioning the project fully to the Vineyard Offshore team.
- Lease area has strong, consistent wind speeds - up to 10m/s. Water depths between 550m and 1,100 m, requiring floating technology. Sea bottom has various degrees of slope.
- Estimated > 1,000MW capacity.
- Significant economic development opportunities for Humboldt County and State of California.
- Close access to Port of Humboldt Bay, large deep -water port well -positioned for offshore wind staging, assembly, and construction. No overhead bridge restrictions.

# Vineyard Offshore: Fisheries Communication Plan

**Crista Bank**

**Travis Lowery**  
**Fisheries Liaison**  
tlowery@vineyardoffshore.com  
508-728-4529

- The Fisheries Communication Plan (FCP) will be based on best practice guidance and input from fishermen and fisheries stakeholders.
- It will outline our proactive approach to fisheries communication to ensure effective and regular engagement with a wide range of fishermen and fisheries stakeholders.
- Our communications plans for our other lease areas have evolved and grown with over ten years of experience.
- The Objectives of the FCP are as follows:
  - engage in proactive communication with fisheries stakeholders;
  - build and maintain relations with the fishing industry and surrounding communities;
  - develop fisheries research programs;
  - identify potential workforce opportunities for fishing industry involvement;
  - responsive to stakeholder feedback and incorporate lessons learned, to ensure communication protocols and tools remain relevant and effective.

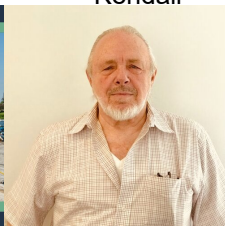

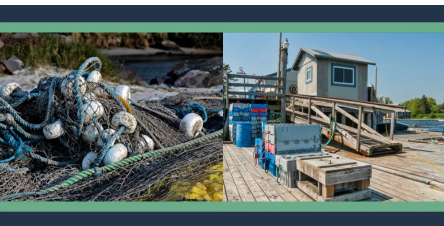

# Vineyard Offshore: Best Practices (Outreach & Communication)

Tyler  
Macallister

The  
Montauk  
Fish Dock

New Bedford  
Seafood  
Consulting Jim  
Kendall

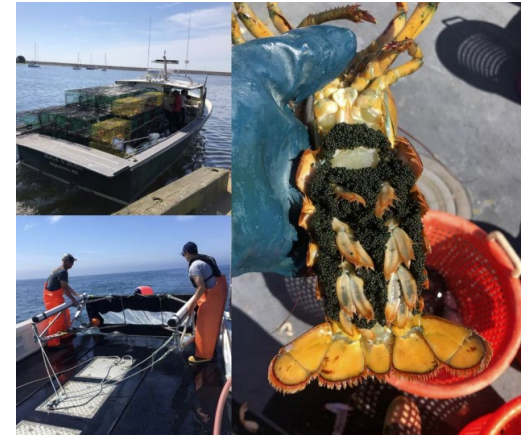

- Have a network of fishing representatives that represent different communities and gear types (mobile, fixed and recreational)
- VW1 project brought on 10 FR's (MA, RI, CT, and NY)
- Bi-weekly meetings with FR's, communication has improved the project by understanding issues faced by fishing industry
- Examples:
  - ASGA (albacore tagging study)
  - Feedback into the Waterfront App
  - Seafood Donation
  - Net Your Problem
- Port Hours
- All FR's read Fisheries Communication Plan and gave feedback which was implemented
- Gear loss claim informed and written by FR's, outreach materials reviewed
- Formed scientific Pre and Post construction surveys with stakeholder input (pier - reviewed by fishing industry and scientist)
- Offered compensation for attending meetings

# Vineyard Offshore: Best Practices (Science)

- Scientific Surveys
  - Drop Camera Survey
  - Ventless Trap and Larval Survey
  - Trawl Survey
  - Acoustic Monitoring of HMS

# Vineyard Offshore: Best Practices (Workforce Opportunities)

- Fishing industry working on the project
  - Scout Vessel
  - Guard Vessel
  - Safety Vessel
  - Research Vessel
  - Onboard Fisheries Liaison
  - Captains Class
  - Fishermen Safety and Survival Training
