Joint HMSAS-HMSMT Meeting on HMS Roadmap Workshop

(9:00 a.m.)

Mike Conroy, Alan Sarich

(Report to the Council in November)

Held in Salon II

In June 2023 the Council decided a new document should be developed to replace the Swordfish Management and Monitoring Plan that considers the range of species, in addition to swordfish, that have been economically important in the large mesh drift gillnet fishery. Because this fishery is slated to close, new fishing opportunities must be explored. This could be facilitated by developing priorities and methods for future exempted fishing permits (EFPs). It directed its HMSMT and HMSAS to hold this joint meeting to plan a workshop, which would consider changes

to plan goals reflecting the change in its scope, the design of EFPs addressing revised goals, transition of drift gillnet fishery participants to new gear types, timing and location of a workshop to facilitate stakeholder participation, and how an outside facilitator could help in the design and execution of such a workshop.

Discussion leaders and rapporteurs for individual topics will be assigned at the start of the joint meeting.

1. Review Council guidance
2. Goals and objectives for an HMS roadmap to succeed the Swordfish Management and Monitoring Plan
3. HMS roadmap document contents
4. Workshop topics and draft agenda
5. Workshop timing, participation and facilitator role
6. Relationship between the HMS roadmap workshop and document
