

PROPOSED AGENDA

Groundfish Subcommittee of the Scientific and Statistical Committee

Pacific Fishery Management Council
Via Webinar

September 26, 2023

Scientific and Statistical Committee (SSC) subcommittee meetings are open to the public and a dedicated public comment period has been scheduled for each day. Additional public comments may be taken at the discretion of the Chair. Instructions for how to connect to the meeting will be posted on the Pacific Fishery Management Council's (Council's) [website](#) prior to the first day of the meeting. In the event an outage occurs, or technical issues arise that impact the experience of remote attendees, we will attempt to resolve them but ultimately, we cannot guarantee that they will be resolved satisfactorily.

Committee member work assignments are noted in parentheses at the end of each agenda item. The first name listed is the discussion leader and the second, the rapporteur. Dates and times on this agenda are subject to change once the meeting begins.

The SSC's Groundfish Subcommittee will conduct this "mop-up" review of the updated quillback rockfish rebuilding analyses, as well as catch-only projections, and prepare their recommendations for the SSC and Pacific Council consideration at their November 2023 meetings. Recommendations from the SSC Groundfish Subcommittee are not considered final until reviewed by the full SSC.

Tuesday, September 26, 2023 – 1:00 PM

A. Welcome and Introductions

1. Roll Call, Introductions, Announcements, etc.
2. Virtual Meeting Logistics
