

GROUNDFISH ADVISORY SUBPANEL REPORT ON MEMBERSHIP APPOINTMENTS  
AND COUNCIL OPERATING PROCEDURES

The Groundfish Advisory Subpanel (GAP) suggests the Pacific Fishery Management Council (Council) consider recommending participants for the Take Reduction Team (TRT), as detailed under [E.1, NMFS Report](#), and as the GAP proposed under Agenda Item [E.1.c, Supplemental GAP Report 1](#) from the following list of industry members. That is, with three people from the West Coast that cover the entire range from Washington to California and have knowledge of multiple fishing sectors.

This should be considered a preliminary list. Assuming the TRT is limited solely to sablefish fixed gear (primarily pot gear), the GAP, Council and National Marine Fisheries Service may have more time to develop a comprehensive list. At this time, we suggest the following:

- **Harrison Ibach:** GAP member, sablefish pot and longline fisherman, Dungeness crabber, a member California Dungeness Crab Task Force
- **Bernie Burkholder:** Experienced sablefish pot and longline fishing, primarily Washington
- **Paul Clampitt:** Experienced in sablefish pot and longline fishing, primarily Washington
- **Georgon “Poggy” Lapham:** Experienced in sablefish pot and longline fishing, Oregon Dungeness crab fisherman, a member of Oregon Department of Fish and Wildlife’s Oregon Dungeness Crab Advisory Committee
- **Dave Kasheta:** Sport representative on the GAP, has fished sablefish both commercially and recreationally, Sport Dungeness crabber and a member of California Department of Fish and Wildlife Dungeness Crab Gear Working Group.
- **Clint Funderberg:** Sablefish fisherman, Dungeness crabber.
