

ADOPT 2024 MANAGEMENT ALTERNATIVES FOR PUBLIC REVIEW

The Pacific Fishery Management Council (Council) will review the Salmon Technical Team (STT) impact analysis (*Agenda Item C.9.a, Supplemental STT Report 1*) and comments from tribes, agencies, advisory bodies, and the public before adopting proposed ocean salmon fishery management alternatives for public review. The adopted alternatives should meet fishery management plan objectives (spawner escapement goals, allocations, annual catch limits, etc.) and encompass a range of alternatives from which the final management measures will emerge. Any need for implementation by emergency rule must be clearly noted and consistent with the Council's and National Marine Fisheries Service's emergency criteria (see Agenda Item C.5, Attachment 2 and Attachment 3).

Council Action:

- 1. Adopt proposed 2024 ocean salmon fishery management alternatives for public review.**
- 2. If necessary, identify and justify any alternative(s) that would require implementation by emergency rule.**
