

GROUND FISH MANAGEMENT TEAM REPORT ON
FUTURE COUNCIL MEETING AGENDA AND WORKLOAD PLANNING

Under Agenda Item F.7, the Pacific Fishery Management Council (Council) gave the Groundfish Management Team (GMT) clarifications and potential new analyses to complete within the harvest specifications and new management measures timeline (Preliminary Preferred Alternative [PPA] April, Final Preferred Alternative [FPA] June). It is expected the Council will have prioritized work for the GMT under that Agenda Item.

However, if this does not occur, the GMT requests the Council prioritize their work on the new or continued analyses that were assigned at this meeting under this agenda item, noting that the GMT will have approximately two weeks to complete the additional analyses for April.
