

GROUND FISH ADVISORY SUBPANEL REPORT ON INSEASON MANAGEMENT  
- FINAL ACTION

The Groundfish Advisory Subpanel (GAP) reviewed the public comment submitted under Inseason requesting an increase to the blue/deacon rockfish limit in addition to the current nearshore rockfish (excluding black rockfish) trip limit north of 40° 10' N. lat. ([Agenda Item F.3, Public Comment, April 2024](#)). The GAP understands this is a California Department of Fish and Wildlife (CDFW) issue and we urge CDFW to compile this and similar trip limit requests, and consider implementing them using the most efficient pathway.
