

CORRECTION TO ATTACHMENT 2: PACIFIC COAST GROUND FISH FISHERY 2025-26 HARVEST SPECIFICATIONS AND MANAGEMENT MEASURES

An error was noted in Attachment 2. Specifically, Table 3 in the Final Preferred Harvest Specifications chapter. Table 3 in that chapter did not provide the FPA for Dover sole. The corrected table is provided on the following page. The correction will be made to the Attachment 2 document post Final Action, which will be made available via the Council's website.

Table 1. FPA The preferred alternative for 2025-26 harvest specifications (mt) for stocks with alternative harvest control rules considered; No Action is the 2023 harvest specification for comparison purposes, Alternative 1 is the default harvest control rule, and Alternative 2-4 are the alternative harvest control rules under consideration. Note: Only the Preliminary Preferred Alternative (PPA), California quillback rockfish has been adopted as of April 2024
