

SALMON ADVISORY SUBPLANEL REPORT ON  
SALMON METHODOLOGY REVIEW – FINAL TOPIC SELECTION

The Salmon Advisory Subpanel received a presentation from Dr. Mike O'Farrell (Chair of the Salmon Technical Team, STT) on the three proposed 2024 Salmon Methodology Review items. Three possible topics for review were discussed with the SAS. The STT recommended Topic 1, the Sacramento Fall Chinook proxy, and Topic 2, the Sacramento Fall Chinook cohort reconstruction, move forward for formal review.

The SAS agrees with the STT's recommendation and reasoning in seeing the first two topics move forward for the 2024 review, and foregoing review on Topic 3 at this current time.
