

HIGHLY MIGRATORY SPECIES ADVISORY SUBPANEL (HMSAS) REPORT ON  
FUTURE COUNCIL MEETING AGENDA AND WORKLOAD PLANNING

The HMSAS supports the [K.4.a Supplemental CPSAS Report 1: CPSAS Report on Future Council Meeting Agenda and Workload Planning](#) which requests replacing coastal pelagic species (CPS) science needs and priorities agenda item with a CPS management needs agenda item. This is important to HMS recreational fisheries and the purse seine fishermen that participate in both HMS and CPS fisheries.

The HMSAS would also appreciate the opportunity to have a joint online meeting with the HMS Management Team in advance of the November Council meeting to discuss the Report out from the HMS Roadmap Workshop and other November Agenda items.
