

COASTAL PELAGIC SPECIES ADVISORY SUBPANEL REPORT ON FUTURE COUNCIL
MEETING AGENDA AND WORKLOAD PLANNING

The Coastal Pelagic Species Advisory Subpanel strongly encourages the Pacific Fishery Management Council to add an agenda item to its November 2025 meeting for sardine management. We recommend that this item consider the development of a purpose and need statement and range of alternatives for a fishery management plan amendment to revise the management of Pacific sardines to include all sardines off the U.S. West Coast.
