

ECOSYSTEM WORKGROUP SUPPLEMENTAL REPORT ON SPECIAL PROJECT 1:
ADAPTIVE MANAGEMENT –NATIONWIDE IF, THEN REVIEW, & COUNCIL MEETING
REQUIREMENTS

The Ecosystem Workgroup (EWG) reviewed and discussed the Pacific Fishery Management Council (Council) staff reports for Agenda Item C.5, Attachments 1 and 2. Following this review, the EWG offers the recommendation below for Council consideration:

- Confirm that the review of if-then statements and Council action meeting requirements be considered complete under the work assigned to Special Project 1.

The EWG recommends considering these two components finished within the body of work identified for Special Project 1 (see [Agenda Item C.3.a, Supplemental EWG Report 1](#)). The information developed through these reviews provides a useful reference should the Council or an individual fishery management plan later explore creating specific if-then mechanisms designed to support timely management adjustments and evaluate whether flexibility exists in the number of Council meetings needed to implement these and other management measures.
