SALMON ADVISORY SUBPANEL REPORT ON FUTURE COUNCIL MEETING AGENDA AND WORKLOAD PLANNING

The Salmon Advisory Subpanel (SAS) reviewed the year-at-a-glance in the briefing book for this agenda item. Given the significance of the proposed agenda items related to Sacramento River fall Chinook for September and November 2026, the SAS supports holding these as in-person meetings.

The SAS suggests that the agenda item tentatively scheduled for September *"Risk Management Framework – Risk Tables, Report and Other Approaches – Scoping"* be postponed at this time considering the numerous other priorities and the reduced capacity of those involved in Council salmon management.
