

**Agenda Item D.4 Allocation Review
Procedures - Preliminary
Council Action:**

- **Preliminary identification of criteria for triggering an allocation review**

D4.

I move the Council to amend the language under the “Procedure” section of Draft Council Operating Procedure 27 to include:

"Shares of harvest involving treaty-reserved or federally-reserved Indian fishing rights are not subject to Council-determined criteria or procedures under NOAA's directives to reassess equitable allocations under the Magnuson Stevens Act. Rather, tribal shares are subject to treaties (as clarified by case law) or are handled in government-to-government agreements outside the Council process."
