

Agenda Item E.4 Central Subpopulation of Northern Anchovy Management Update

Council Action:

- 1. Consider Materials Related to:**
 - a. Determining a method to estimate the nearshore component of the stock not sampled by the Acoustic-Trawl Methodology.**
 - b. Determining the timeline and process necessary to conduct the near-term establishment of an OFL for the CSNA stock using the methods described in the SSC report (Agenda Item C.4.a, Supplemental SSC Report 1, April 2018).**
 - c. Scope the process for recommending the frequency of revisions to OFLs and ABCs based on the potential impacts of changing reference points less frequently against potentially increased risk associated with not basing reference points on the most recent data.**
- 2. Provide Further Guidance as Appropriate.**

DRAFT-NOT FOR ADMIN

I move that the Council:

Schedule a meeting including the CPSMT, CPSAS, SSC CPS Subcommittee, and SWFSC to determine the nearshore estimation methodologies necessary to complement the ATM survey, review Dr. Punt's analysis of frequency to revisit OFLs and recommend an appropriate frequency for CSNA, develop alternatives for accountability measures that would be triggered at specific stock levels, and determine which data to use to analyze whether a trigger has been reached. Report to the Council in November 2019. (Briana Brady/Marc Gorelnik) Motion carried unan.

DRAFT-NOT FOR ADMINISTRATIVE PURPOSES
